

Protect & Prosper New Zealand

EMERGENCY HOUSING POLICY

Updated February 2023

1. Develop a plan to address the current emergency housing crisis. Get all of the emergency housing residents out of emergency housing and into permanent housing.
2. Develop a satisfactory solution to relocate all of the large numbers of people living in cars into permanent housing.
3. Develop a 'property development financial model' and 'deal structure' involving the combination of 'public' and 'private' partnership, so that accommodation can be produced in large quantities at the most affordable price possible.
